

Geography in Year 6

Geographical Vocabulary

Word	Definition
Drought	A long period with little or no rain.
Physical Features	Natural features of the landscape, such as mountains and rivers.
Human Features	Features created by people, such as buildings and roads.
Wildfire	An uncontrolled fire in a natural area.
Biodegradable	Able to break down naturally.
Sustainability	Using resources in a way that protects the future.
Pollution	Harmful substances in the environment.
Climate	Long-term weather patterns.

Oh I do like to be beside the seaside (Sustainability)

Unfortunately, some of plastic's best properties, such as its durability and long-lasting life, are the things that cause problems in the environment. Unless recycled, they remain on our planet, clogging up landfills and making their way to the ocean. Plastic can take over 400 years to decompose (break down), and even then, it just gets smaller and ends up being swallowed by fish and other marine animals and birds and is eventually eaten by humans.

Survival

In 2020, the devastating Australian bushfires significantly impacted the nation's wildlife, affecting an estimated 3 billion animals. These fires, part of the "Black Summer", burned across millions of hectares,
