Science

Key Questions

1. What are the five senses?
2. Which part of the body do you smell with?
3. Which part of the body do you taste with?
4. Which part of the body do you touch things with?
5. Which part of the body so you see with?
6. Which part of the body do you hear with?

Key Vocabulary

body - The main part of a person.

skeleton - All the bones inside our body make up our skeleton. Our skeleton supports our body and helps us to move.

senses - Our senses help us to learn about our surroundings.

skin - Your skin gives you the sense of touch. You can tell if something is warm, cold, smooth or rough without even looking at it!

eyes - Your eyes let you see all the things around you. They help us to see by letting light messages get to our brain.

ears - Your ears let you listen to all the things around you. Your brain can tell what different sounds are.

nose - You smell using your nose. Your nose can tell if things smell nice or not nice.

tongue - a fleshy part of the mouth used for talking, swallowing and tasting. Your sense of taste comes from your tongue. You can tell if something tastes bitter or sweet. You might have some tastes you like and some you don't.
